

To begin configuring your Windows 7 or Windows 8 computer for the wireless network, click **NWCCD_Guest**. **NWCCD_Guest** will become highlighted when it is selected. After selecting **NWCCD_Guest**, click the connect button. Please wait while your device obtains an IP address. When your network status shows connected, launch a web browser and then attempt to proceed to the web site you want to be connected to. You should then be directed to the NWCCD Acceptable Use of Computing Resource Page.

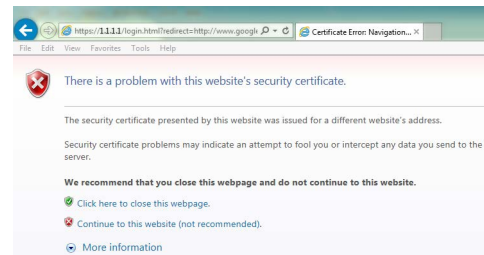

Windows 7

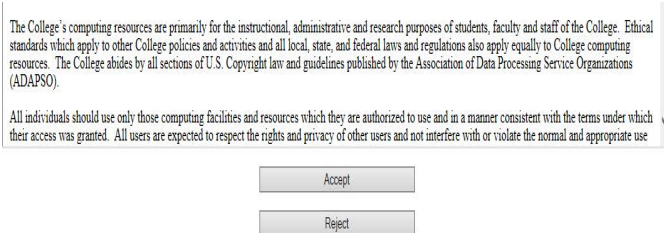

Windows 8

If you are unable to reach the acceptable use page, you can type in 1.1.1.1 in the web browser's address bar. You may receive a browser warning indicating there is a problem with this website's security certificate. The warning will vary according to the browser that you are currently using. Select continue to proceed to the **NWCCD_Guest** wireless terms page.

After selecting continue, you will see the **NWCCD_Guest** wireless terms page. You must accept the terms and conditions to use **NWCCD_Guest** wireless. After accepting the terms and conditions you will automatically be redirected to **www.sheridan.edu**.

After **6 hours** of time has expired, you will be temporarily removed from the **NWCCD_Guest** network and you will be required to accept the terms again. To be reconnected, you can enter 1.1.1.1 in your browsers address bar or simply open a new tab and perform a search to be redirected to the wireless terms page.
