

Background Screening

Northern Wyoming Community College District (NWCCD) believes that hiring qualified individuals to fill positions contributes to the overall strategic success of NWCCD. Background checks serve as an important part of the selection process at NWCCD. Background information is collected as a means of promoting a safe environment for current and future NWCCD employees and students. Background checks also help NWCCD obtain additional applicant related information that helps determine the applicant's overall employability, to protect the people, property, and information of the organization.
