# Connecting to NWCCD Guest Wireless
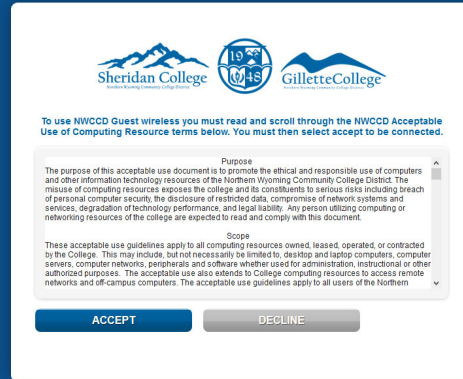

Guest wireless is available once you have connected and accepted the **NWCCD Acceptable Use of Computing Resource Terms.**
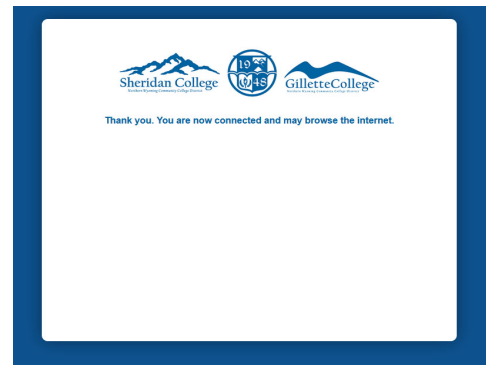

To connect to NWCCD_Guest Wireless

From your device's wireless connection settings, find the **NWCCD_Guest** wireless broadcast. Select **NWCCD_Guest** to connect.	From a Windows 10 or 11 system NWCCD_Guest Open From an iPhone or iPad device NWCCD_Guest Unsecured Network
As your system is connecting, you may receive the following message. Select **Connect**.	NWCCD_Guest Other people might be able to see info you send over this network ☐ Connect automatically Connect
You may be re-directed to the **NWCCD Acceptable Use of Computing Resource Terms** page. **You must scroll to the bottom of the page, and then click on the Accept button.** If you are not re-directed to this page, assure your network status shows connected, and then utilizing your web browser, attempt to proceed to the website you want to connect to.	

If you are not, please refer to the Troubleshooting Section of this document.	
After accepting the terms, you will be directed to a page informing you that you are connected to the network. You may now browse the Internet.	

Troubleshooting

Your device is not re-directed to the **NWCCD Acceptable Use of Computing Resource Terms** page.	• Type in 192.168.1.1 in your browser address bar. • If still having issues, open a new browser window and type 192.168.1.1 in this new window's address bar. If these are not successful, verify your device is set to DHCP. If you still experience issues, please contact the NWCCD Information Technology Services Department at 1-307-675-0555 for assistance.
